DETAILED ACTION

Claim Objections

1. Claim 13 is objected to because of the following informalities: In line 2, it appears “plat” should be changed to --plate--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claim 1 recites a generic “product” in a functional recitation in the preamble. Claim 2 positively recites the “product” as being mail pieces. Since the product does not appear to be part of the claimed invention, claim 2 is confusing.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3651

5. Claims 1-4, 7, 8, 10, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Ueda et al. USP 5,427,226.

See the attached marked up cover sheet of Ueda et al. depicting the claimed features.

6. Claims 1-3, 6-12, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Pena USP 5,779,432.

See the attached marked up copy of Pena drawing figure 2 depicting the claimed features.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 3651

9. Claims 13 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pena (as cited above).

Pena teaches the claimed invention as outline in the above paragraph. Pena fails to teach a spring loaded mechanism for this plate. Pena utilizes a mechanically pivoting rod for moving his plate back into place. It would have been obvious to one having ordinary skill in the art at the time the invention was made to substitute a spring loaded pivoting rod instead of the pivot rod turning mechanism as taught by Pena, since the examiner takes Official Notice of the equivalence of a motorized pivoting rod and a mechanical spring loaded device to push the plate back into position and the selection of any of these known mechanical equivalents to push the plate back would be well within the level of ordinary skill in the art.

Allowable Subject Matter

10. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
